**DETAILED ACTION**

1. The Amendment filed by Applicant on 01/06/04 has been entered.

***Response to Amendment/Arguments***

2. Applicant's amendment and arguments filed on 01/06/04 have been fully considered and they are found persuasive.

3. The rejection of claims 1-11 under 35 U.S.C. 102(e) as being anticipated by Maeda et al., U.S. Patent No. 6,287,723 (hereinafter "Maeda") is withdrawn.

***Allowable Subject Matter/Reasons for Allowance***

4. Claims 1-11 are allowed.

5. The following is an examiner's statement of reasons for allowance: The closest prior art located or identified by the Examiner is Maeda. Maeda teaches an anode binder which includes a nonionic polymer monomer in the presence of a nonionic surfactant. The binders include a 2-ethylhexyl acrylate-methyl acrylate-methoxy polyethyleneglycol mono-methacrylate copolymer.

Art Unit: 1713

The polymerizations are carried out at temperature of about 80°C. The present invention differs from Maeda in that Maeda does not teach the gel content of the copolymer.

6. As of the date of this Notice of Allowance, the Examiner has not located or identified any reference that can be used singularly or in combination with another reference including Maeda to render the present invention anticipated or obvious to one of ordinary skill in the art.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
